

## Special Issue

# Physiology and Pathophysiology of Oxygen Sensitivity

### Message from the Guest Editors

This Special Issue will include a selection of research papers and review articles related to O<sub>2</sub> sensing and oxidative stress, physiological responses to acute or chronic hypoxia, and maladaptive responses to the hypoxic environment and their more recent translational implications. We are currently seeking to expand the content of the Issue and would welcome the submission of up-to-date review articles and experimental papers. We dedicate this Special Issue to our colleagues who made important contributions to the field of chemoreception and particularly to our understanding of the carotid body (CB) and who have passed away in the last decade: Prof. Sukhamay Lahiri (2009), Prof. Constancio Gonzalez (2015), Prof. Machiko Shirahata (2016), and Prof. Chris Peers (2018). We may have lost them, but their legacy continues through the research of many scientific heirs, students, collaborators, and friends.

### Guest Editors

Prof. Dr. Asuncion Rocher

Department of Biochemistry, Molecular Biology and Physiology, Institute of Molecular Biology and Genetics (IBGM), University of Valladolid-CSIC, Valladolid, Spain

Dr. Philip I. Aaronson

Department of Inflammation Biology, School of Immunology and Microbial Sciences, King's College London, London, UK

### Deadline for manuscript submissions

closed (15 April 2021)

## About the Journal

### Message from the Editor-in-Chief

It has been recognized in medical sciences that in order to prevent adverse effects of “oxidative stress” a balance exists between prooxidants and antioxidants in living systems. Imbalances are found in a variety of diseases and chronic health situations. Our journal *Antioxidants* serves as an authoritative source of information on current topics of research in the area of oxidative stress and antioxidant defense systems. The future is bright for antioxidant research and since 2012, *Antioxidants* has become a key forum for researchers to bring their findings to the forefront.

---

### Editor-in-Chief

Prof. Dr. Alessandra Napolitano

Department of Chemical Sciences, University of Naples “Federico II”,  
Via Cintia 4, I-80126 Naples, Italy

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, FSTA, PubAg, CAPlus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q1 (Chemistry, Medicinal) / CiteScore - Q1 (Food Science)
