Smart Structures and Systems: Actual Scientific and Industrial Research

Guest Editors: Message from the Guest Editors Prof. Dr. Martin Wiedemann Based on our 4SMARTS conference this Special Issue aims to summarize the recent advances in the field of smart Prof. Dr. Hans Peter Monner structures and systems. It is intended to cover both university research and industrial applications. Dr. Malte Misol The focus will be on the interdisciplinary topic area of Dr. Thomas Haase active, intelligent and adaptive-in short: smart structures Prof. Dr. Tobias Melz and systems. Starting with materials, over the virtualization and Dr. Sven Herold optimization of components as well as the integration of Dr. Ursula Eul functions, up to ensuring the reliability of smart structures and systems, this Special Issue covers all relevant fields of technology. In addition to the classic applications of active vibration, sound and shape control, numerous other Deadline for manuscript submissions: applications are addressed, including condition and closed (31 December 2021) structural health monitoring or autonomous systems. We would like to invite the whole smart structures and system community to contribute to this Special Issue. With kind regards, Prof. Dr. Martin Wiedemann Prof. Dr. Hans Peter Monner Dr. Thomas Haase Prof. Dr. Tobias Melz

Dr. Sven Herold
