Special Issue

Mechanics and Control using Fractional Calculus

Message from the Guest Editors

This Special Issue provides an advanced forum for studies related to fractals and fractional calculus and their applications in different fields of science and engineering focused on mechanics (electrical and motion) and control. The Issue publishes regular research papers, reviews, and even short notes. Our aim is to encourage authors to publish experimental and theoretical results in as much detail as possible; therefore, there is no restriction on the length of the papers as details of the experiment and any calculations must be provided so that the results can be reproduced. Manuscripts regarding research proposals and research ideas are particularly welcome. Electronic files containing details of calculations and experimental procedures can be deposited as supplementary material.

Guest Editors

Prof. Dr. Timothy Sands

Prof. Dr. Kevin Bollino

Prof. Matt Crook

Prof. Ross Eldred

Deadline for manuscript submissions

closed (31 December 2022)
