

Special Issue

Advances in Bacterial Motility

Message from the Guest Editor

This Special Issue delves into the fascinating world of bacterial motility, exploring the diverse mechanisms and adaptations that enable these microorganisms to navigate their environments. Original research articles and reviews are welcome. Research areas may include (but are not limited to) the following: **Fundamental Mechanisms of Bacterial Movement Adaptive Strategies in Bacterial Locomotion Ecological and Pathological Implications Evolutionary Perspectives Technological and Biomedical Applications** We look forward to receiving insightful contributions to generate a comprehensive issue on bacterial motility and further dialogue among the researchers of this diverse multidisciplinary community.

About the Journal

Message from the Editor-in-Chief

Applied Microbiology (ISSN 2673-8007) is a peer-reviewed open access journal that provides an advanced forum for the international community to report and discuss established and emerging applications for microorganisms and their associated technologies. Research articles, reviews, and other publications are released online immediately after acceptance to provide timely unlimited free access to the scientific community and the general public. We would be pleased to welcome you as one of our authors.

Editor-in-Chief

Prof. Dr. Ian Connerton

Division of Microbiology, Brewing and Biotechnology, University of Nottingham, Loughborough LE12 5RD, UK

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, EBSCO, Embase, and other databases.

Journal Rank:

CiteScore - Q2 (Biochemistry, Genetics and Molecular Biology (miscellaneous))
