Message from the Guest Editors

Dear Colleagues,

Energy is one of the key sources of modern life and a major driver of economic growth. It is therefore recognised that energy determines the economic and social development of the world. As a result, there is a steadily growing interest in the development of alternative, environmentally friendly energy sources. Although renewable energy is the fastest growing energy sector in the world, fossil fuels supply the vast majority of the world's energy needs. Therefore, it is extremely important to conduct research on renewable energy. The search for new energy materials and technologies guarantees the safe development of the world.

Message from the Editor-in-Chief

As the world of science becomes ever more specialized, researchers may lose themselves in the deep forest of the ever increasing number of subfields being created. This open access journal Applied Sciences has been started to link these subfields, so researchers can cut through the forest and see the surrounding, or quite distant fields and subfields to help develop his/her own research even further with the aid of this multi-dimensional network.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), Inspec, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q2 (*Engineering, Multidisciplinary*) / CiteScore - Q1 (*General Engineering*)
