Message from the Guest Editors

Dear Colleagues,

At the forefront of high-end technology development, advanced precision machining and manufacturing technology has become the mainstream and is rapidly developing into a science that studies various high-precision manufacturing processes and methods. It involves the interdisciplinary integration of machinery, optics, materials, physics, and other disciplines and is widely used in consumer electronics, security, home appliances, automobiles, medical treatment, astronomy, industrial testing, national defense, aerospace and other industries.

Message from the Editor-in-Chief

As the world of science becomes ever more specialized, researchers may lose themselves in the deep forest of the ever increasing number of subfields being created. This open access journal *Applied Sciences* has been started to link these subfields, so researchers can cut through the forest and see the surrounding, or quite distant fields and subfields to help develop his/her own research even further with the aid of this multi-dimensional network.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), Ei Compendex, Inspec, Embase, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q2 (Engineering, Multidisciplinary) / CiteScore - Q1 (Fluid Flow and Transfer Processes)
