

Low-Power Integrated Circuit Design and Application

Guest Editors:

Dr. Anindita Paul

Department of Computer Science
and Electronics, Morehead State
University, Morehead, KY 40351,
USA

**Prof. Dr. Jaime Ramirez-
Angulo**

Klipsch School of Electrical
Engineering, New Mexico State
University, Las Cruces, NM 88003,
USA

Deadline for manuscript
submissions:

20 January 2025

Message from the Guest Editors

The number of connected devices in IoT applications is expected to exceed 40 billion in 2025. Thus, it is vital to tackle the challenges involved in the design of ultra-low power solutions to ensure the feasibility of current and future systems, as well as to propose new mechanisms and energy extraction circuits that can complement or even replace the use of batteries. To achieve these goals, it is necessary to use special techniques to design low-power analog/digital integrated circuits.

For this Special Issue, authors are encouraged to submit their original research on the use of low-power integrated circuits to improve the energy efficiency of systems. Topics of interest include, but are not limited to, the following fields:

- Novel energy harvesters;
- Novel power management techniques and circuits;
- Low-power sensor interfaces;
- Low-power analog and mixed-signal circuits.

an Open Access Journal by MDPI

Editor-in-Chief

Prof. Dr. Giulio Nicola Cerullo
Dipartimento di Fisica,
Politecnico di Milano, Piazza L.
da Vinci 32, 20133 Milano, Italy

Message from the Editor-in-Chief

As the world of science becomes ever more specialized, researchers may lose themselves in the deep forest of the ever increasing number of subfields being created. This open access journal Applied Sciences has been started to link these subfields, so researchers can cut through the forest and see the surrounding, or quite distant fields and subfields to help develop his/her own research even further with the aid of this multi-dimensional network.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), Inspec, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q1 (Engineering, Multidisciplinary) / CiteScore - Q1 (General Engineering)
