## **Artificial Intelligence in Smart Buildings**

Guest Editors:

#### **Prof. Dr. Anastasios Dounis**

Department of Biomedical Engineering, Egaleo Park Campus, University of West Attica, 12243 Athens, Greece

#### Dr. Panagiotis Kofinas

Department of Industrial Design and Production Engineering, University of West Attica, University Campus 2, P. Ralli & Thivon 250, 12244 Egaleo-Athens, Greece

Deadline for manuscript submissions:

closed (31 May 2021)

## **Message from the Guest Editors**

With recent advances in artificial intelligence, energy and the built environment are becoming more and more closely linked. The term "artificial intelligence" refers to intelligence demonstrated by machines that perform cognitive functions associated with the human minds. The concept is related to machines that process large amounts of information either using historical data or data acquired via interaction with the environment, and which continually learn through the consequences of action-result combinations. Artificial techniques can be used in smart buildings in order to improve their performance in a fully automated concept.

This Special Issue encourages authors from both industry and academia to develop advanced artificial intelligence approaches in smart buildings and submit original research papers contributing to the aforementioned challenges.

#### **Editor-in-Chief**

# **Prof. Dr. Giulio Nicola Cerullo**Dipartimento di Fisica, Politecnico di Milano, Piazza L. da Vinci 32, 20133 Milano, Italy

## **Message from the Editor-in-Chief**

As the world of science becomes ever more specialized, researchers may lose themselves in the deep forest of the ever increasing number of subfields being created. This open access journal Applied Sciences has been started to link these subfields, so researchers can cut through the forest and see the surrounding, or quite distant fields and subfields to help develop his/her own research even further with the aid of this multi-dimensional network

#### **Author Benefits**

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), Inspec, CAPlus / SciFinder, and other databases.

**Journal Rank:** JCR - Q1 (Engineering, Multidisciplinary) / CiteScore - Q1 (General Engineering)
