### Message from the Guest Editor

In this Special Issue of *applied sciences*, we seek to publish papers dealing with carbonaceous particles in the ambient atmosphere as well as those produced from various sources in laboratory and field studies, addressing their measurements, physical and chemical properties, aging and transformation, toxicity, and effects on climate and human health. Topics include but not limited:

- Carbonaceous measurements
- PM physical and chemical properties
- Long-range transport
- Aging and transformation
- Toxicity
- Source apportionment modeling

## Message from the Editor-in-Chief

As the world of science becomes ever more specialized, researchers may lose themselves in the deep forest of the ever increasing number of subfields being created. This open access journal Applied Sciences has been started to link these subfields, so researchers can cut through the forest and see the surrounding, or quite distant fields and subfields to help develop his/her own research even further with the aid of this multi-dimensional network.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), Inspec, CAPlus / SciFinder, and other databases.

**Journal Rank:** JCR - Q1 (Engineering, Multidisciplinary) / CiteScore - Q1 (General Engineering)
