Deadline for manuscript
submissions:

closed (30 June 2020)

Message from the Guest Editor

The present Special Issue aims to explore this diversity of application of quantum mechanics—including *ab initio*, semi-empirical, DFT, and *post-Hartree Fock* methods—in the study of the electronic structure of molecules and their reactivity.

This Special Issue invites researchers to submit original research papers and review articles related to any chemical problem to which quantum mechanics has been applied. The topics of interest include, but are not limited to:

- Development and Application of QM Methods
- QM Studies on Catalysis
- QM Studies on Magnetic Systems
- QM Studies on Excited States
- QM Studies on Transition Metal Chemistry
- QM Studies on Organic Chemistry
- QM and QM/MM Studies Applied Biological Systems
- Quantum Dynamics
- New or Improved Quantum Mechanical Methods
- Software Programs featuring QM codes

Message from the Editor-in-Chief

As the world of science becomes ever more specialized, researchers may lose themselves in the deep forest of the ever increasing number of subfields being created. This open access journal Applied Sciences has been started to link these subfields, so researchers can cut through the forest and see the surrounding, or quite distant fields and subfields to help develop his/her own research even further with the aid of this multi-dimensional network.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), Inspec, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q2 (*Engineering, Multidisciplinary*) / CiteScore - Q1 (*General Engineering*)
