

Advances in Biomedical Image Processing and Diagnostic Techniques

Guest Editor:

Dr. Juliana Dushanova

Institute of Neurobiology,
Bulgarian Academy of Sciences,
Acad. G. Bonchev Str., bl. 23, 1113
Sofia, Bulgaria

Deadline for manuscript
submissions:

closed (20 March 2023)

Message from the Guest Editor

This Special Issue will highlight both clinical needs and technical challenges in medical imaging processing and describe how emerging trends in connectome are addressing these issues. Topics covered will include network architecture, learning, interpretability, uncertainty quantification. We are looking to present studies that are related to digital pathology mainly in the brain, particularly prominent research highlights related to clinical study applications. Artificial intelligence and neural networks are significant procedures that tackle the medical diagnosis issue. Disease prediction is one of the basic tasks for medical diagnosis software. As of late, deep learning strategies have been effectively used in different applications to aid medical diagnosis. We will address research challenges and suggested solutions, as well as future promises and directions for further developments. Proposing new neural network algorithms, different machine learning techniques, and deep learning architectures could improve the detection of brain anomalies, providing timely diagnosis that could reduce the patient's risk for long-term symptoms and lasting deficits.

an Open Access Journal by MDPI

Editor-in-Chief

Prof. Dr. Giulio Nicola Cerullo

Dipartimento di Fisica,
Politecnico di Milano, Piazza L.
da Vinci 32, 20133 Milano, Italy

Message from the Editor-in-Chief

As the world of science becomes ever more specialized, researchers may lose themselves in the deep forest of the ever increasing number of subfields being created. This open access journal Applied Sciences has been started to link these subfields, so researchers can cut through the forest and see the surrounding, or quite distant fields and subfields to help develop his/her own research even further with the aid of this multi-dimensional network.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), Inspec, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q2 (*Engineering, Multidisciplinary*) / CiteScore - Q1 (*General Engineering*)
