# Biometric Signals-Based Artificial Intelligence Technologies for Health Assessment

Guest Editors:

## Dr. Dijana Petrovska-Delacrétaz

Telecom SudParis, Institut Polytechnique de Paris, 91120 Palaiseau, France

#### Prof. Dr. Mounim A. El Yacoubi

Telecom SudParis, Institut Polytechnique de Paris, 91120 Palaiseau, France

Deadline for manuscript submissions:

closed (25 May 2022)

# **Message from the Guest Editors**

Biometrics have been deployed at a large scale. The main factors are: the availability of large biometric datasets, and the systematic application of effective machine learning and, more recently, deep learning models for classification.

Recently, researchers have started to developt digital biomarkers. These endeavors, however, are facing several challenges associated with the lack of sufficient training data related to e-health, the need for decision understandability by the stakeholders, and the optimal specificity and sensitivity required for these tools to be usable in practice. As a result, the artificial intelligence techniques considered in the e-health field should, among others, be based on sound transfer learning from the security context to the health one, be as interpretable as possible, and be assessed according to sound evaluation metrics.

This Special Issue aims at gathering recent interdisciplinary research advancements in artificial intelligence algorithms, particularly advanced machine/deep learning methods that harness biometric signals to develop tools for aiding diagnosis and, in general, to assess an individual's health status

As the world of science becomes ever more specialized, researchers may lose themselves in the deep forest of the ever increasing number of subfields being created. This open access journal Applied Sciences has been started to link these subfields, so researchers can cut through the forest and see the surrounding, or quite distant fields and subfields to help develop his/her own research even further with the aid of this multi-dimensional network

### **Author Benefits**

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), Inspec, CAPlus / SciFinder, and other databases.

**Journal Rank:** JCR - Q1 (Engineering, Multidisciplinary) / CiteScore - Q1 (General Engineering)
