Synthesis, Characterization and Applications of Biopolymer Aerogels

Guest Editor:

Dr. Seeni Meera Kamal Mohamed

Department of Aerogels and Aerogel Composites, Institute of Materials Research, German Aerospace Center (DLR), Linder Hoehe, 51147 Köln, Germany

Deadline for manuscript submissions:

closed (30 October 2022)

Message from the Guest Editor

In this issue, we aim to highlight the use of biopolymers such as cellulose, alginate, chitosan, starch, chitin, proteins, etc. for the production of aerogels in the form of monoliths, microbeads, fibers, papers (sheets), microparticles, foams, and so on. We encourage authors to contribute original research papers, communication and review articles related to current developments, and applications in the area of biopolymer aerogels.

Editor-in-Chief

Prof. Dr. Takayoshi Kobayashi Advanced Ultrafast Laser

Research Center, The University of Electro-Communications, 1-5-1, Chofugaoka, Chofu, Tokyo 182-8585, Japan

Message from the Editor-in-Chief

As the world of science becomes ever more specialized, researchers may lose themselves in the deep forest of the ever increasing number of subfields being created. This open access journal Applied Sciences has been started to link these subfields, so researchers can cut through the forest and see the surrounding, or quite distant fields and subfields to help develop his/her own research even further with the aid of this multi-dimensional network

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), Inspec, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q2 (*Engineering, Multidisciplinary*) / CiteScore - Q1 (*General Engineering*)
