### Message from the Guest Editors

This Special Issue provides a platform for a review of these disciplines and the presentation of cognitive research as an independent field of study.

Potential topics include, but are not limited to the following:

- Applications of human-computer interfaces, human factors, and human performance
- Artificial intelligence and applications in cognitive sciences
- Data analytics and computer-aided analysis in cognitive sciences
- Cognitive learning, interactive education, digital pedagogy, problem solving abilities, applications of adaptive testing
- Mental health, neurodevelopmental disorders, psychological experiments and applications
- Emotion representations and signal characteristics that describe and identify emotions or stress, user studies and evaluation techniques for emotion detection
- Measurement and collection platforms for emotion detection, presentation and applications of emotions

## Message from the Editor-in-Chief

As the world of science becomes ever more specialized, researchers may lose themselves in the deep forest of the ever increasing number of subfields being created. This open access journal Applied Sciences has been started to link these subfields, so researchers can cut through the forest and see the surrounding, or quite distant fields and subfields to help develop his/her own research even further with the aid of this multi-dimensional network.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), Inspec, CAPlus / SciFinder, and other databases.

**Journal Rank:** JCR - Q1 (Engineering, Multidisciplinary) / CiteScore - Q1 (General Engineering)
