

Solar Cells: Recent Advances, Perspectives and Applications

Guest Editors:

Dr. Masafumi Yamaguchi

Semiconductor Laboratory,
Toyota Technological Institute,
Nagoya 468-8511, Japan

Prof. Dr. Kensuke Nishioka

Faculty of Engineering, University
of Miyazaki, Miyazaki 889-2192,
Japan

Deadline for manuscript
submissions:

31 August 2024

Message from the Guest Editors

Photovoltaics (PV) are expected to help create a clean energy society as they have the highest potential for energy sources. In order to enhance PV from 1 TW to more than 50 TW, further development of high-efficiency, low-cost, and highly reliable solar cells and the creation of new markets by developing integrated photovoltaics is needed. This Special Issue provides an overview and a perspective of various advanced solar cells and the potential of integrated photovoltaics.

Keywords:

- solar cells
- Si
- III-V
- II-VI
- chalcopyrite
- perovskite
- organic
- quantum effects
- concentrator PV
- space solar cells
- integrated photovoltaics
- agrivoltaics

an Open Access Journal by MDPI

Editor-in-Chief

Prof. Dr. Giulio Nicola Cerullo

Dipartimento di Fisica,
Politecnico di Milano, Piazza L.
da Vinci 32, 20133 Milano, Italy

Message from the Editor-in-Chief

As the world of science becomes ever more specialized, researchers may lose themselves in the deep forest of the ever increasing number of subfields being created. This open access journal Applied Sciences has been started to link these subfields, so researchers can cut through the forest and see the surrounding, or quite distant fields and subfields to help develop his/her own research even further with the aid of this multi-dimensional network.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), Inspec, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q2 (*Engineering, Multidisciplinary*) / CiteScore - Q1 (*General Engineering*)
