### Message from the Guest Editors

Following the end of the Flomeko 2019 conference, the Scientific Committee will select a number of papers, based on their scientific originality and on the relevance of their topics, for publication in this Special Issue. Theoretical and experimental contributions, original and review studies, and industrial and university research will be welcome. The selected authors will then be invited to submit extended versions of their conference paper. The main topics include, but are not limited to the following:

Prototyping and full-scale testing; NEMS and MEMS technologies; Instrumentation; data acquisition and processing; metrology; monitoring; experimental tests; measurements; optimum experimental techniques; study cases

## Message from the Editor-in-Chief

As the world of science becomes ever more specialized, researchers may lose themselves in the deep forest of the ever increasing number of subfields being created. This open access journal Applied Sciences has been started to link these subfields, so researchers can cut through the forest and see the surrounding, or quite distant fields and subfields to help develop his/her own research even further with the aid of this multi-dimensional network.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), Inspec, CAPlus / SciFinder, and other databases.

**Journal Rank:** JCR - Q2 (*Engineering, Multidisciplinary*) / CiteScore - Q1 (*General Engineering*)
