

Recent Advances in Medicinal and Synthetic Organic Chemistry

Guest Editors:

Dr. Giuseppe D'Orazio

Department of Chemistry,
University of Milan, 20133 Milan,
Italy

Dr. Laura Morelli

Department of Medical
Biotechnology and Translational
Medicine, University of Milan, Via
Saldini 50, 20133 Milan, Italy

Dr. Sarah Mazzotta

Department of Chemistry,
University of Milan, Via Golgi 19,
20133 Milan, Italy

Deadline for manuscript
submissions:

20 August 2024

Message from the Guest Editors

Medicinal chemistry is a constantly developing and evolving branch of life science research. It consists of the invention, design, identification and preparation of biologically active compounds. Synthetic organic chemistry, therefore, plays a key role in this type of research: the modification and manipulation of chemicals by increasingly emerging and innovative methods expand the possibility of synthesizing new compounds and molecules. In recent years, discoveries in these fields have increased exponentially, making a significant contribution to the scientific community to overcome the continuing challenges that will need to be faced.

The present Special Issue “Recent Advances in Medicinal and Synthetic Organic Chemistry” aims to collect significant and cutting-edge research works and bring out new ideas in the fields of Medicinal and Organic Chemistry. The Special Issue will consider recent works highlighting contributions on the following topics:

- Organic synthesis and innovative methodologies
- Homogeneous and heterogeneous catalysis
- Green chemistry
- Medicinal chemistry
- Agrochemicals and agro-drugs
- Bio-organic chemistry
- Natural products synthesis

an Open Access Journal by MDPI

Editor-in-Chief

Prof. Dr. Giulio Nicola Cerullo

Dipartimento di Fisica,
Politecnico di Milano, Piazza L.
da Vinci 32, 20133 Milano, Italy

Message from the Editor-in-Chief

As the world of science becomes ever more specialized, researchers may lose themselves in the deep forest of the ever increasing number of subfields being created. This open access journal Applied Sciences has been started to link these subfields, so researchers can cut through the forest and see the surrounding, or quite distant fields and subfields to help develop his/her own research even further with the aid of this multi-dimensional network.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), Inspec, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q2 (*Engineering, Multidisciplinary*) / CiteScore - Q1 (*General Engineering*)
