Message from the Guest Editors

Dear Colleagues,

Global climate change has become a hot topic in today's world. In recent years, the impact of climate change on terrestrial vegetation and soil microbiocenoses has been extensively studied. The systematic collection and collation of domestic and foreign research results on the impact of climate change on vegetation and soil are conducive to further understanding of the impact of climate change on the living environment.

In this Special Issue, we are looking forward to receiving your original work on the topic of "Effects of Global Warming and Greenhouse Gas Emissions on Soil". We sincerely hope that this invitation will spark your interest in publishing your latest contributions in this Special Issue dedicated to this highly topical, emerging scientific field.

an Open Access Journal by MDPI

Editor-in-Chief

Prof. Dr. Giulio Nicola Cerullo

da Vinci 32, 20133 Milano, Italy

Message from the Editor-in-Chief

As the world of science becomes ever more specialized, researchers may lose themselves in the deep forest of the ever increasing number of subfields being created. This open access journal Applied Sciences has been started to link these subfields, so researchers can cut through the forest and see the surrounding, or quite distant fields and subfields to help develop his/her own research even further with the aid of this multi-dimensional network.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), Inspec, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q2 (*Engineering, Multidisciplinary*) / CiteScore - Q1 (*General Engineering*)
