

Laser Technologies and Nonlinear Optics in Surface Sciences

Guest Editors:

Prof. Dr. Zhenxu Bai

Center for Advanced Laser
Technology, Hebei University of
Technology, Tianjin 300401,
China

Prof. Dr. Qiang Wu

School of Physics, Nankai
University, Tianjin 300071, China

Dr. Quan Sheng

School of Precision Instruments
and Optoelectronics Engineering,
Tianjin University, Tianjin 300072,
China

Deadline for manuscript
submissions:

closed (31 August 2022)

Message from the Guest Editors

Dear Colleagues,

We are inviting submissions to the Special Issue on Application of Surface Laser Technologies.

Since the invention in 1960, laser technology plays a pivotal role in modern society, meanwhile, the rapid development of lasers has injected new vitality into the research of nonlinear optics. In recent decades, the continuously emerging optical materials, modulation technology, amplification technology, nonlinear frequency conversion technology, have greatly improved the power and coherence of lasers, compressed the time scale of laser pulses, and expanded the wavelength coverage. At present, laser and nonlinear optics technologies enable technological progress in several fields including quantum optics, manufacturing, space exploration, Lidar, optical signal processing. Furthermore, all of these technologies are nowadays providing fundamental analysis tools in high-end scientific research, such as optical frequency comb, microimaging, etc., in addition, have also gone into everyday consumer products, such as displays, sensors, etc.

an Open Access Journal by MDPI

Editor-in-Chief

Prof. Dr. Giulio Nicola Cerullo

Dipartimento di Fisica,
Politecnico di Milano, Piazza L.
da Vinci 32, 20133 Milano, Italy

Message from the Editor-in-Chief

As the world of science becomes ever more specialized, researchers may lose themselves in the deep forest of the ever increasing number of subfields being created. This open access journal Applied Sciences has been started to link these subfields, so researchers can cut through the forest and see the surrounding, or quite distant fields and subfields to help develop his/her own research even further with the aid of this multi-dimensional network.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), Inspec, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q2 (*Engineering, Multidisciplinary*) / CiteScore - Q1 (*General Engineering*)
