New Challenges in Improving the Quality and Safety of Meat Products

Guest Editors:

Dr. Małgorzata Karwowska
Department of Meat Technology and Food Quality, University of Life Sciences in Lublin, Skromna 8, 20-704 Lublin, Poland

Prof. Dr. Jose Lorenzo Rodriguez
Centro Tecnológico de la Carne de Galicia, 32900 Orense, Spain

Prof. Dr. Igor Tomasevic
Department of Animal Production Technology, Faculty of Agriculture, University of Belgrade, 11080 Belgrade, Serbia

Deadline for manuscript submissions:
closed (20 May 2022)

Message from the Guest Editors

Dear Colleagues,

Among the various food items, meat products constitute a significant share in the diet of modern man. At the same time, there is a growing demand for meat products that present a high quality in the context of nutritional value, sensory attractiveness and availability, while ensuring their safety. To meet the above requirements, the current industry and researchers have focused their efforts on finding innovations in the meat industry aimed at processing and designing new products (including functional food).

We invite you to publish original research papers and reviews on topics related to meat products' quality and safety, advanced technologies in processing, the adulteration of meat products, new preservation techniques for meat, and the nutritional value and functional features of meat products.

Dr. Małgorzata Karwowska

Message from the Editor-in-Chief

As the world of science becomes ever more specialized, researchers may lose themselves in the deep forest of the ever increasing number of subfields being created. This open access journal Applied Sciences has been started to link these subfields, so researchers can cut through the forest and see the surrounding, or quite distant fields and subfields to help develop his/her own research even further with the aid of this multi-dimensional network.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.
High Visibility: indexed within Scopus, SCIE (Web of Science), Inspec, CAPlus / SciFinder, and other databases.
Journal Rank: JCR - Q2 (*Engineering, Multidisciplinary*) / CiteScore - Q1 (*General Engineering*)
