Modeling of Metal Removal Processes

Guest Editors:

Prof. Dr. Grzegorz Królczyk

Department of Manufacturing Engineering and Production Automation, Faculty of Mechanical Engineering, Opole University of Technology, 5 Mikolajczyka Street, 45-271 Opole, Poland

Dr. Gorka Urbikain

UPV/EHU, University of the Basque Country, CFAA (Center for Advanced Manufacturing Aeronautics), Alameda de Urquijo s/n, 48013 Bilbao, Spain

Dr. Daniel Olvera Trejo

Tecnológico de Monterrey, Escuela de Ingeniería y Ciencias, Ave. Eugenio Garza Sada 2501, Monterrey, NL 64849, Mexico

Message from the Guest Editors

Dear Colleagues,

This Special Issue on the topic of “Modelling of Metal Removal Process” is oriented toward (but not limited to) those recent advances in the modeling of machining processes and particularly focused on predicting and optimizing key variables such as cutting forces, tool wear, and surface roughness. As a result, the works will offer some clues with respect to the optimization of machining processes and toolpath trajectories, the development of new gen technologies and processes, and so on.

Artificial intelligent models and optimization techniques to improve process reliability.

Prof. Dr. Grzegorz Królczyk
Dr. Gorka Urbikain
Dr. Daniel Olvera Trejo
Guest Editors

Deadline for manuscript submissions:

closed (25 February 2022)

Special Issue

an Open Access Journal by MDPI

Editor-in-Chief

Prof. Dr. Giulio Nicola Cerullo
Dipartimento di Fisica,
Politecnico di Milano, Piazza L.
da Vinci 32, 20133 Milano, Italy

Message from the Editor-in-Chief

As the world of science becomes ever more specialized, researchers may lose themselves in the deep forest of the ever increasing number of subfields being created. This open access journal Applied Sciences has been started to link these subfields, so researchers can cut through the forest and see the surrounding, or quite distant fields and subfields to help develop his/her own research even further with the aid of this multi-dimensional network.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), Inspec, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q1 (Engineering, Multidisciplinary) / CiteScore - Q1 (General Engineering)
