Molecular Sieves: Synthesis, Characterization and Application (Concerning to the 6th Cycle of Lectures on Molecular Sieves)

Guest Editors:

Prof. Dr. Sibebe Pergher

Departamento de Química,
Universidade Federal do Rio
Grande do Norte, Natal, Caixa
1524, Brazil

**Prof. Dr. Katia Bernardo-
Gusmão**

Instituto de Química,
Universidade Federal do Rio
Grande do Sul, Porto Alegre, RS
15003, Brazil

Deadline for manuscript
submissions:
closed (31 August 2021)

Message from the Guest Editors

This Special Issue will be dedicated to Molecular Sieves concerning the annual Cycles of Lectures on Molecular Sieves held on 2013 to 2018 in Brazil (Natal, Campinas and Porto Alegre). These lectures addressed the synthesis, characterization, and application of molecular sieves materials such as zeolitic type materials, mesoporous materials (SBA-15, MCM-41, HMS, and similar), metal-organic framework structures (MOFs), porous carbons, and lamellar materials (pillared clays, HDL, and delaminated materials), and their applications in adsorption, catalysis, and separation process. This Special Issue will give a global vision of researchers from world-wide universities, research centers, and industry working on molecular sieves materials and sharing the latest results on their synthesis and characterization, giving rise a special interest in their applications in basic and industrial processes.

Keywords

- molecular sieves materials
- zeolites
- pillared clays
- mesoporous materials
- MOFs
- porous carbon
- lamellar materials
- catalysis
- adsorption
- separation

an Open Access Journal by MDPI

Editor-in-Chief

Prof. Dr. Giulio Nicola Cerullo
Dipartimento di Fisica,
Politecnico di Milano, Piazza L.
da Vinci 32, 20133 Milano, Italy

Message from the Editor-in-Chief

As the world of science becomes ever more specialized, researchers may lose themselves in the deep forest of the ever increasing number of subfields being created. This open access journal *Applied Sciences* has been started to link these subfields, so researchers can cut through the forest and see the surrounding, or quite distant fields and subfields to help develop his/her own research even further with the aid of this multi-dimensional network.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), Ei Compendex, Inspec, Embase, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q2 (Engineering, Multidisciplinary) / CiteScore - Q1 (General Engineering)
