Message from the Guest Editors

Dear Colleagues,

We are all called upon to keep up with the developments that are occurring simultaneously in dentistry. New technologies, as well as digital devices, are available to enhance the effectiveness of the diagnostic process and increase the spectrum of detectable pathologies, dimorphisms, and dysfunctions in the orofacial region, as well as to the new clinical approach to comprehensive dental care, and oral microbiome.

The aim of this Special Issue is to provide the available evidence-based data of innovative advances and knowledge in diagnostic and therapeutic technologies in the orofacial field from childhood to adulthood. Orthopedic treatments, maxillofacial surgery or otolaryngology procedures to manage craniofacial malformations and head and neck disorders are well accepted as well as sleep apnea syndrome treatment.

In this regard, clinical and research studies are welcome. Case reports, communication, and reviews including studies involving the aforementioned topics will also be welcome.

We hope that the combination of research and clinical reviews will contribute to enhancing our readers' knowledge and advancing the field.

an Open Access Journal by MDPI

Message from the Editor-in-Chief

As the world of science becomes ever more specialized, researchers may lose themselves in the deep forest of the ever increasing number of subfields being created. This open access journal Applied Sciences has been started to link these subfields, so researchers can cut through the forest and see the surrounding, or quite distant fields and subfields to help develop his/her own research even further with the aid of this multi-dimensional network.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), Inspec, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q2 (*Engineering, Multidisciplinary*) / CiteScore - Q1 (*General Engineering*)
