Nano-systems for Antimicrobial Therapy

Guest Editors:

Prof. Dr. Angelo Maria Taglietti

Department of Chemistry,
University of Pavia, I-27100 Pavia,
Italy

Dr. Giacomo Dacarro

Dipartimento di Chimica,
Università di Pavia, viale
Taramelli, 12, 27100 Pavia, Italy

Deadline for manuscript
submissions:

closed (31 July 2018)

Message from the Guest Editors

Dear Colleagues,

Antimicrobial nanoparticles and nanocomposite materials have caused increasing interest over the past 20 years. Several nano-systems have been shown to be able to contribute to fight bacterial proliferation, prevent infections, and limit the enormous problem of biofilm formation on surfaces, prostheses, internalized medical devices, and in all cases where microbial presence is a factor of risk for human health. The development of innovative approaches for the realization of microbicidal and antibacterial nano-systems is flourishing and increasing scientific, technological, and industrial interests are paving the way to new types of active materials.

The time is right for an overview of the considerable efforts that are being carried out, and which are still needed to obtain efficient nano-systems with the ability to limit the proliferation of micro-organisms, or to achieve their complete eradication.

applied

an Open Access

Journal by MDPI

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or institutions.
Editorial Board: Prof. Dr. **Giulio Nicola Cerullo**, Dipartimento di Fisica, and other distinguished researchers.

High Visibility: indexed within Scopus, SCIE (Web of Science Core Collection), JCR, and other databases.

Journal Rank: JCR Q1 (Engineering, Multidisciplinary) / CiteScore - Q1 (General Engineering, Multidisciplinary)

Message from the Editor-in-Chief

As the world of scientific journals continues to become more specialized, researchers may lose themselves in the deep forest of the ever-increasing number of subfields being created. This

Special Issue

open access journal Applied Sciences has been started to link these subfields, so researchers can cut through the forest and see the surrounding, or quite distant fields and subfields to help develop his/her own research even further with the aid of this multi-dimensional network.
