University, Tokyo 164-8530,
Japan

Deadline for manuscript
submissions:

closed (31 December 2020)

Message from the Guest Editor

Nanomaterials are highly functional materials, and there are many types of products deriving from them around us. However, there are also many unknowns regarding the potential environmental and health risks of nanomaterials. Extensive research on nanomaterials is necessary, including toxicity, environmental effects, and exposure risks. This Special Issue focuses on a wide range of topics such as toxicity, safety assessment, environmental effects, health effects, and toxicity mechanisms related to nanomaterials, aiming at a broad understanding and elucidation of nanotoxicology.

Message from the Editor-in-Chief

As the world of science becomes ever more specialized, researchers may lose themselves in the deep forest of the ever increasing number of subfields being created. This open access journal Applied Sciences has been started to link these subfields, so researchers can cut through the forest and see the surrounding, or quite distant fields and subfields to help develop his/her own research even further with the aid of this multi-dimensional network.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), Inspec, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q2 (*Engineering, Multidisciplinary*) / CiteScore - Q1 (*General Engineering*)
