Deadline for manuscript
submissions:

closed (31 July 2023)

Message from the Guest Editors

Dear Colleagues,

The unstoppable advancement of biomedical technologies, and, in particular, those related to the production of omics data, has led to a rapid advancement in all areas of biology and medicine and for all kingdoms of life. At the same time, the need for new tools to support the management and analysis of the data produced also continues to grow and open up new research horizons.

In this context, bioinformatics provides tools and pipelines to facilitate the elaboration of biomedical data, and computational biology helps to improve our understanding and characterization of biological systems.

In this Special Issue, we invite submissions exploring highly innovative applications in the fields of bioinformatics and computational biology. Potential topics include, but are not limited to, the following:

- New algorithms and pipelines for biomedical data analyses;
- Approaches for integrated biomedical data analyses (omics, bioimages, clinical and lifestyle data);
- New databases and collections of biomedical resources;
- Innovative applications of artificial intelligence to biomedical issues;
- High-throughput omics data analyses;
- Health-care applications.

an Open Access Journal by MDPI

Editor-in-Chief

Prof. Dr. Giulio Nicola Cerullo

Dipartimento di Fisica,
Politecnico di Milano, Piazza L.
da Vinci 32, 20133 Milano, Italy

Message from the Editor-in-Chief

As the world of science becomes ever more specialized, researchers may lose themselves in the deep forest of the ever increasing number of subfields being created. This open access journal Applied Sciences has been started to link these subfields, so researchers can cut through the forest and see the surrounding, or quite distant fields and subfields to help develop his/her own research even further with the aid of this multi-dimensional network.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), Inspec, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q2 (*Engineering, Multidisciplinary*) / CiteScore - Q1 (*General Engineering*)
