Message from the Guest Editors

Dear Colleagues,

Headache disorders are recognized as highly prevalent and/or disabling conditions. Headaches are also often comorbid with temporomandibular disorders and/or cervical musculoskeletal dysfunctions. Over the past decades, physical therapy management of these conditions has gained recognition in the treatment of these disorders with a gradual implementation in the headache multiprofessional team worldwide. However, we still have a lack of good quality studies that provide evidence of potential effective interventions. Moreover, evidence that would help to clarify the sensory and functional dysfunctions that need to be addressed and about the quality and applicability of their clinical assessment is also lacking. We thus invite you to submit your research on these topics. This Special Issue welcome well-designed and good-quality studies in this field, such as original studies, clinical trial reviews, and meta-analyses.

Message from the Editor-in-Chief

As the world of science becomes ever more specialized, researchers may lose themselves in the deep forest of the ever increasing number of subfields being created. This open access journal Applied Sciences has been started to link these subfields, so researchers can cut through the forest and see the surrounding, or quite distant fields and subfields to help develop his/her own research even further with the aid of this multi-dimensional network.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), Inspec, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q2 (*Engineering, Multidisciplinary*) / CiteScore - Q1 (*General Engineering*)
