Message from the Guest Editors

This Special Issue covers broad topics on polymer nanoscience and nanotechnology in the context of fundamental and applied sciences (e.g., synthetic chemistry, polymer physics and theory, nanoscale analysis, materials application, or processing; but not limited to them). Interdisciplinary approaches are also welcomed. The Special Issue will publish full research papers, communications, and reviews. Topics of interest include but are not limited to:

- polymer chemistry
- polymer physics
- nanoscience
- nanotechnology
- materials
- polymer processing
- polymer analysis

Message from the Editor-in-Chief

As the world of science becomes ever more specialized, researchers may lose themselves in the deep forest of the ever increasing number of subfields being created. This open access journal Applied Sciences has been started to link these subfields, so researchers can cut through the forest and see the surrounding, or quite distant fields and subfields to help develop his/her own research even further with the aid of this multi-dimensional network.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), Inspec, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q2 (*Engineering, Multidisciplinary*) / CiteScore - Q1 (*General Engineering*)
