Message from the Guest Editors

At present, quantum communication is one of the most prominent areas of emerging quantum technologies, with new applications, such as the quantum internet, which will become a reality in the near future. To leverage this new reality, the development of new applications of quantum communication is growing.

Therefore, theoretical as well as computational and experimental studies and new developments and applications of quantum communications are all welcome in this Special Issue. Topics of interest include, but are not limited to, the following areas:

quantum communication protocols
applications for secure quantum communications
key distribution/arrangement schemes
secure multi-party computation
authentication schemes
blind computation
contract signing
semi-quantum communication applications

an Open Access Journal by MDPI

Editor-in-Chief

Prof. Dr. Giulio Nicola Cerullo

Dipartimento di Fisica,
Politecnico di Milano, Piazza L.
da Vinci 32, 20133 Milano, Italy

Message from the Editor-in-Chief

As the world of science becomes ever more specialized, researchers may lose themselves in the deep forest of the ever increasing number of subfields being created. This open access journal Applied Sciences has been started to link these subfields, so researchers can cut through the forest and see the surrounding, or quite distant fields and subfields to help develop his/her own research even further with the aid of this multi-dimensional network.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), Inspec, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q2 (*Engineering, Multidisciplinary*) / CiteScore - Q1 (*General Engineering*)
