# **Seismic Metamaterials**

Guest Editors:

#### **Message from the Guest Editors**

**Dr. Sebastien Guenneau** Institut Fresnel, Aix-Marseille University, CNRS, CEDEX 20, F-13397 Marseille, France

#### Prof. Dr. Stéphane Brûlé

Rhone-Alpes Branch of Menard company

Deadline for manuscript submissions: closed (31 December 2018) Dear Colleagues,

Seismic metamaterials is an emerging topic at the interface between three communities: researchers working on the control of electromagnetic, acoustic, and elastodynamic waves, geophysicists, and civil engineers. This Special Issue aims at bridging these three disciplines together to provide a survey of recent progress on the control of seismic waves in structured soils.

## **Editor-in-Chief**

#### Message from the Editor-in-Chief

**Prof. Dr. Giulio Nicola Cerullo** Dipartimento di Fisica, Politecnico di Milano, Piazza L. da Vinci 32, 20133 Milano, Italy As the world of science becomes ever more specialized, researchers may lose themselves in the deep forest of the ever increasing number of subfields being created. This open access journal Applied Sciences has been started to link these subfields, so researchers can cut through the forest and see the surrounding, or quite distant fields and subfields to help develop his/her own research even further with the aid of this multi-dimensional network.

## **Author Benefits**

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.
High Visibility: indexed within Scopus, SCIE (Web of Science), Inspec, CAPlus / SciFinder, and other databases.
Journal Rank: JCR - Q2 (*Engineering, Multidisciplinary*) / CiteScore - Q1 (*General Engineering*)
