School of Engineering, University
of Basilicata, 85100 Potenza, Italy

Deadline for manuscript
submissions:

closed (31 May 2020)

Message from the Guest Editor

In order to mitigate the seismic risk and reduce the direct and indirect losses, public administrations, private, owners, and professionals, despite operating at different territorial scales, with different objectives and tools, should be perform a synergic work based on the rational criteria and tools. The effectiveness and reliability of the assessment, and the resulting seismic risk mitigation strategies should be based on tools and models that can simulate seismic effects, in terms of direct and indirect losses.

This Special Issue calls for high-quality unpublished research works related to different and advanced approaches for seismic risk mitigation. Potential topics include, but are not limited to, the following:

- Innovative, simple, fast, readily available, and economically sustainable retrofitting strategies and optimized rules;
- Definition of rational criteria for risk-mitigation policies;
- Allocation of the resources based on novel approaches and methods;
- Seismic vulnerability evaluation and retrofit of buildings, structures, and infrastructures;
- Structural control, monitoring, and assessment of structural damage;
- Seismic hazard analysis;
- Case studies.

an Open Access Journal by MDPI

Editor-in-Chief

Prof. Dr. Giulio Nicola Cerullo
Dipartimento di Fisica,
Politecnico di Milano, Piazza L.
da Vinci 32, 20133 Milano, Italy

Message from the Editor-in-Chief

As the world of science becomes ever more specialized, researchers may lose themselves in the deep forest of the ever increasing number of subfields being created. This open access journal Applied Sciences has been started to link these subfields, so researchers can cut through the forest and see the surrounding, or quite distant fields and subfields to help develop his/her own research even further with the aid of this multi-dimensional network.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), Inspec, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q1 (Engineering, Multidisciplinary) / CiteScore - Q1 (General Engineering)
