

Cyber–Physical System and Edge Computing: Current Applications and Future Trends

Guest Editors:

Dr. Anikó Costa

Department of Electrical and
Computer Engineering, Faculty of
Sciences and Technology, NOVA
University of Lisbon, Campus de
Caparica, 2829-516 Caparica,
Portugal

Dr. Grzegorz Bazydło

Institute of Control &
Computation Engineering,
University of Zielona Gora, ul.
prof. Z. Szafrana 2, 65-516
Zielona Gora, Poland

Deadline for manuscript
submissions:

closed (20 December 2024)

Message from the Guest Editors

We invite contributions that address, but are not limited to, the following topics:

1. **Real-world Implementations:** Case studies and success stories of CPS and edge computing applications across industries such as healthcare, transportation, manufacturing, smart cities, and more.
2. **Technological Advancements:** Cutting-edge technologies and methodologies driving the integration of CPS and edge computing, including AI-driven optimization, blockchain solutions, and beyond.
3. **Challenges and Solutions:** Discussions on key challenges such as security, scalability, and interoperability, along with innovative approaches to mitigate these issues.
4. **Future Trajectories:** Speculations on emerging trends and technologies that are poised to shape the future of CPS and edge computing, including advancements in autonomous systems, 5G connectivity, and the impact of quantum computing.

an Open Access Journal by MDPI

Editor-in-Chief

Prof. Dr. Giulio Nicola Cerullo
Dipartimento di Fisica,
Politecnico di Milano, Piazza L.
da Vinci 32, 20133 Milano, Italy

Message from the Editor-in-Chief

As the world of science becomes ever more specialized, researchers may lose themselves in the deep forest of the ever increasing number of subfields being created. This open access journal *Applied Sciences* has been started to link these subfields, so researchers can cut through the forest and see the surrounding, or quite distant fields and subfields to help develop his/her own research even further with the aid of this multi-dimensional network.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), Ei Compendex, Inspec, Embase, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q2 (Engineering, Multidisciplinary) / CiteScore - Q1 (General Engineering)
