Message from the Guest Editors

Dear Colleagues,

We welcome you to submit your manuscript to this Special Issue of *Applied Sciences*. This issue focuses on the monitoring and/or treatment of traditional (e.g., nutrients, pathogens, sediment, heavy metals) and emerging (e.g., SARS-CoV-2, pharmaceuticals and personal care products, perfluorinated compounds) contaminants in the water environment. We are soliciting experimental and observational studies documenting concentration or mass reductions in these chemicals in drinking water supplies, groundwater, surface water, and wastewater treatment systems. Short communications and full-length, completed studies describing monitoring techniques and/or treatment processes and technologies will be considered.

Prof. Dr. Charles Humphrey
Dr. Guy Iverson

Message from the Editor-in-Chief

As the world of science becomes ever more specialized, researchers may lose themselves in the deep forest of the ever increasing number of subfields being created. This open access journal Applied Sciences has been started to link these subfields, so researchers can cut through the forest and see the surrounding, or quite distant fields and subfields to help develop his/her own research even further with the aid of this multi-dimensional network.

Author Benefits

Open Access:— free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), Inspec, CAPlus / SciFinder, and many other databases.

Journal Rank: JCR - Q2 (Engineering, Multidisciplinary) / CiteScore - Q2 (General Engineering)
