Deadline for manuscript
submissions:

20 June 2024

Message from the Guest Editor

Dear Colleagues,

This Special Issue is devoted to the application of the tribological property in engine and transmission. This issue seeks to publish original research papers of the highest scientific quality to provide an archival resource for scientists from all backgrounds. Research on friction, lubrication, and wear of the engine and transmission is welcomed. Written contributions are invited reporting experimental and modeling studies both in the tribological field of the engine and transmission, such as journal bearing, gears, piston ring, and cam roller pair. In addition, the relation between the dynamical characteristics and the tribological characteristics of the engine and transmission is also welcome.

Message from the Editor-in-Chief

As the world of science becomes ever more specialized, researchers may lose themselves in the deep forest of the ever increasing number of subfields being created. This open access journal Applied Sciences has been started to link these subfields, so researchers can cut through the forest and see the surrounding, or quite distant fields and subfields to help develop his/her own research even further with the aid of this multi-dimensional network.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), Inspec, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q2 (*Engineering, Multidisciplinary*) / CiteScore - Q1 (*General Engineering*)
