submissions:

closed (30 September 2022)

Message from the Guest Editors

Dear Colleagues,

This Special Issue on “Clean Energy and Fuels Storage” is focused on state-of-the-art technologies in developing and demonstrating efficient storage systems using clean and renewable energy and/or fuel sources. Some of the cutting-edge research areas for sustainable energy storage systems are from hydrogen/hydride, direct electric, electrochemical, thermochemical, thermomechanical, and solar-thermal energy. We invite contributions in these aforementioned R&D areas and their applications related to stationary and mobile transportations, power utilities, and alternative energy and fuel storage technologies, including carbon capture.

Dr. Sesha S. Srinivasan

Dr. Varsha Khare

da Vinci 32, 20133 Milano, Italy

Message from the Editor-in-Chief

As the world of science becomes ever more specialized, researchers may lose themselves in the deep forest of the ever increasing number of subfields being created. This open access journal Applied Sciences has been started to link these subfields, so researchers can cut through the forest and see the surrounding, or quite distant fields and subfields to help develop his/her own research even further with the aid of this multi-dimensional network.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), Inspec, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q2 (*Engineering, Multidisciplinary*) / CiteScore - Q1 (*General Engineering*)
