### Message from the Guest Editors

Dear Colleagues:

The 4th International Conference on Nanojoining and Microjoining will be held in Nara, Japan on December 2–5, 2018. The conference provides a platform for scientific and industrial discussion and exchange in the emerging fields of nano and micro joining technologies.

The main goal of this special issue is to advance the new science and technology in the fields of e.g. micro-electronics, medical implants, sensing devices and packaging, which have an urgent need for advanced joining technologies to integrate, package and assemble nano- and micro-scale materials and components at ever-low temperatures. We invite investigators interested in nano- and microjoining innovation to contribute to this issue with **400CHF** publication discount, the topics will cover all fields of NMJ2018.

Dr. Anming Hu
