Message from the Guest Editors

Dear Colleagues,

Food safety is a kind of guardian angel of the valuable nutrients, and at the same time, it is a strict necessity. Food microbiology is the core of food safety, destined to face various challenges originating from the production circumstances, the processing procedures, and of course, from the transportation and storage conditions. Given the fact that new technologies, novel products and modern mentalities shape the food market and hence food production, the mission of food microbiology becomes more challenging and, furthermore, more exciting.

If you are interested, we would like to invite you to submit original research papers in the field of contemporary challenges in food microbiology, for this Special Issue of *Applied Sciences*. Classical and emerging food-borne pathogens, resistance to antibiotics, foods as vehicle of diseases and new technologies are some indicative areas of interest, yet research on any other area of food microbiology will be welcomed.

Message from the Editor-in-Chief

As the world of science becomes ever more specialized, researchers may lose themselves in the deep forest of the ever increasing number of subfields being created. This open access journal Applied Sciences has been started to link these subfields, so researchers can cut through the forest and see the surrounding, or quite distant fields and subfields to help develop his/her own research even further with the aid of this multi-dimensional network.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), Inspec, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q2 (*Engineering, Multidisciplinary*) / CiteScore - Q1 (*General Engineering*)
