Message from the Guest Editors

Dear Colleagues,

We are inviting submissions to this Special Issue on “Clear Orthodontic Aligners Treatment: Current State and Future Possibilities”.

Clear aligner treatment (CAT) is becoming a topic of growing importance in contemporary orthodontics, as a great number of patients seek this kind of approach. Scientific literature today still lacks high-quality papers with definitive results on the real efficiency of CAT. In this Special Issue, we invite submissions exploring various aspects of CAT from clinicians’ point of view but also from patients’ point of view. We ask for scientific research focused on the predictability of movements, efficacy of staging protocols, CAT in children and in teenage patients, quality of life in patients treated with CAT, changes in oral microbiome, and future prospectives.

- clear aligner
- esthetics
- finite element analysis
- predictability
- patient perception
- oral microbioma
- tooth movement

an Open Access Journal by MDPI

Message from the Editor-in-Chief

As the world of science becomes ever more specialized, researchers may lose themselves in the deep forest of the ever increasing number of subfields being created. This open access journal Applied Sciences has been started to link these subfields, so researchers can cut through the forest and see the surrounding, or quite distant fields and subfields to help develop his/her own research even further with the aid of this multi-dimensional network.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), Ei Compendex, Inspec, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q2 (Engineering, Multidisciplinary) / CiteScore - Q1 (General Engineering)
