## **Laser Interaction with Plasmonic Nanostructures**

Guest Editors:

#### Dr. Andrés Guerrero-Martínez

Departamento de Química Física, Facultad de Ciencias Químicas, Universidad Complutense de Madrid, 28040 Madrid, Spain

### Dr. Ovidio Peña-Rodríguez

Instituto de Fusión Nuclear, Universidad Politécnica de Madrid, E-28006 Madrid, Spain

Deadline for manuscript submissions:

closed (30 June 2018)

# **Message from the Guest Editors**

Dear Colleagues,

Plasmonics is the branch of science that deals with the interaction between the electromagnetic field and the free electrons in a metal, as well as their potential applications. In nanostructured metals this interaction produces the localized surface plasmon resonances (LSPR), which can be defined as the collective oscillation of conduction electrons in resonance with the incoming light. The LSPR can be tuned by changing parameters, such as the size, shape, and composition of the nanoparticles, but also the nature of the excitation source. We focus this Special Issue on the effects of this interaction that open new perspectives for designing novel devices and applications in a wide variety of fields. All the topics related to the interaction of lasers with plasmonic nanostructures. including, but not restricted to, the previous examples, are invited to this Special Issue.

## **Message from the Editor-in-Chief**

As the world of science becomes ever more specialized, researchers may lose themselves in the deep forest of the ever increasing number of subfields being created. This open access journal Applied Sciences has been started to link these subfields, so researchers can cut through the forest and see the surrounding, or quite distant fields and subfields to help develop his/her own research even further with the aid of this multi-dimensional network

## **Author Benefits**

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), Ei Compendex, Inspec, CAPlus / SciFinder, and other databases.

**Journal Rank:** JCR - Q2 (Engineering, Multidisciplinary) / CiteScore - Q1 (General Engineering)
