Deadline for manuscript
submissions:

closed (30 April 2022)

Message from the Guest Editor

This Special Issue aims to provide an excellent forum for scientists and engineers to share and discuss their pioneering/original findings or insightful reviews on the sustainable utilization of primary and secondary raw materials. Reports on capturing the whole/wide raw material value chain via geometallurgical or process mineralogical approach are particularly encouraged. On the other hand, any kind of contribution under the broad frame work of sustainable utilization is also welcome.

Keywords:

- Geometallurgy/process mineralogy
- Complex ore/waste
- Characterization
- Process intensification
- Environmental/economic evaluation

an Open Access Journal by MDPI

Message from the Editor-in-Chief

As the world of science becomes ever more specialized, researchers may lose themselves in the deep forest of the ever increasing number of subfields being created. This open access journal Applied Sciences has been started to link these subfields, so researchers can cut through the forest and see the surrounding, or quite distant fields and subfields to help develop his/her own research even further with the aid of this multi-dimensional network.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), Inspec, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q1 (Engineering, Multidisciplinary) / CiteScore - Q1 (General Engineering)
