Message from the Guest Editors

Dear Colleagues,

This Special Issue covers all aspects of novel lighting systems, where intelligence has been embedded into the lighting system. These include methods for light production, energy saving, control systems, visible light communications, as well as developing lighting for wellbeing, context aware lighting and lighting for special needs. Both indoor and outdoor lighting are covered and the applications in the new fields of intelligent lighting in game industry, spectral imaging, etc., are also welcome.

Message from the Editor-in-Chief

As the world of science becomes ever more specialized, researchers may lose themselves in the deep forest of the ever increasing number of subfields being created. This open access journal Applied Sciences has been started to link these subfields, so researchers can cut through the forest and see the surrounding, or quite distant fields and subfields to help develop his/her own research even further with the aid of this multi-dimensional network.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), Inspec, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q1 (Engineering, Multidisciplinary) / CiteScore - Q1 (General Engineering)
