Message from the Guest Editors

Dear Colleagues,

Recent advancements of Virtual Reality (VR) technologies provide new opportunities for cultural heritage organizations to attract, engage, and support end-users more efficiently and effectively by creating unprecedented interactive experiences that can scaffold users' creativity, learning, collaboration, and entertainment. However, several user studies have underpinned the necessity to further investigate and improve current approaches and practices related to the design, implementation, and evaluation of VR applications to meet and fulfill the needs and requirements of all involved stakeholders. One possible way to achieve this objective is through the provision of personalized VR user experiences that cater to the diverse characteristics and requirements of stakeholders.

The aim of this Special Issue is to attract leading researchers at the intersection of VR and cultural heritage in an effort to highlight the latest exciting developments in this field discuss the underlying methods and approaches for designing, implementing and evaluating VR experiences in the cultural heritage domain.

Message from the Editor-in-Chief

As the world of science becomes ever more specialized, researchers may lose themselves in the deep forest of the ever increasing number of subfields being created. This open access journal Applied Sciences has been started to link these subfields, so researchers can cut through the forest and see the surrounding, or quite distant fields and subfields to help develop his/her own research even further with the aid of this multi-dimensional network.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), Inspec, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q2 (*Engineering, Multidisciplinary*) / CiteScore - Q1 (*General Engineering*)
