

Special Issue

Dynamics of Geohazards

Message from the Guest Editor

This Special Issue aims to bring together cutting-edge research on the mechanics, modeling, monitoring, and mitigation of dynamic geohazards. We welcome studies that advance theoretical frameworks, numerical simulations, laboratory experiments, and field observations, as well as interdisciplinary approaches linking geotechnical engineering, hydrology, climatology, and remote sensing. By deepening our knowledge of the dynamics of geohazards, this collection seeks to provide a scientific basis for early warning systems, hazard mapping, and integrated disaster risk management under current and future climate change scenarios.

Guest Editor

Dr. Yu Zhuang

College of Civil Engineering, Hunan University, Changsha, China

Deadline for manuscript submissions

20 June 2026

About the Journal

Message from the Editor-in-Chief

As the world of science becomes ever more specialized, researchers may lose themselves in the deep forest of the ever increasing number of subfields being created. This open access journal *Applied Sciences* has been started to link these subfields, so researchers can cut through the forest and see the surrounding, or quite distant fields and subfields to help develop his/her own research even further with the aid of this multi-dimensional network.

Editor-in-Chief

Prof. Dr. Giulio Nicola Cerullo
Dipartimento di Fisica, Politecnico di Milano, Piazza L. da Vinci 32,
20133 Milano, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, Inspec, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Engineering, Multidisciplinary) / CiteScore - Q1 (General Engineering)
