

Special Issue

Antenna Technology for 5G Communication

Message from the Guest Editors

Research areas may include, but are not limited to, the following:

- Novel antenna designs for millimeter-wave frequencies.
- MIMO (Multiple Input Multiple Output) antenna systems for improved capacity and efficiency.
- Smart antennas and beamforming technologies for dynamic coverage.
- Integration of antennas with emerging technologies such as IoT and smart cities.

We look forward to receiving your contributions, which will further enrich the knowledge base in this critical area of research.

About the Journal

Message from the Editor-in-Chief

As the world of science becomes ever more specialized, researchers may lose themselves in the deep forest of the ever increasing number of subfields being created. This open access journal *Applied Sciences* has been started to link these subfields, so researchers can cut through the forest and see the surrounding, or quite distant fields and subfields to help develop his/her own research even further with the aid of this multi-dimensional network.
