Special Issue

Rotator Cuff Disease: Diagnosis, Analysis and Treatment

Message from the Guest Editor

We are interested in the articles related with the diagnosis, analysis and treatment of rotator cuff tears. The diagnosis of rotator cuff diseases is becoming more and more accurate with the advancement of technology such as artificial intelligence, which is also our interest. Many factors are related with the rotator cuff tear and its treatment results, such as the rotator cuff tear status, rotator cuff muscle condition, or various metabolic diseases; however, these are not fully understood and represent an area of interest. In addition, new surgical techniques and their related materials as well as various biological and biomechanical approaches including preclinical trials for the treatment of the rotator cuff disease are our top interests.

About the Journal

Message from the Editor-in-Chief

As the world of science becomes ever more specialized, researchers may lose themselves in the deep forest of the ever increasing number of subfields being created. This open access journal Applied Sciences has been started to link these subfields, so researchers can cut through the forest and see the surrounding, or quite distant fields and subfields to help develop his/her own research even further with the aid of this multi-dimensional network.

Editor-in-Chief

Prof. Dr. Giulio Nicola Cerullo
Dipartimento di Fisica, Politecnico di Milano, Piazza L. da Vinci 32, 20133 Milano, Italy

Author Benefits

Open Access:
free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:
indexed within Scopus, SCIE (Web of Science), Ei Compendex, Inspec, CAPlus / SciFinder, and other databases.

Journal Rank:
JCR - Q2 (Engineering, Multidisciplinary) / CiteScore - Q1 (General Engineering)
