

## Special Issue

# Microplastics in the Environment: Extent of the Problem and Technical Solutions to Address the Issue

### Message from the Guest Editors

This Special Issue aims to collect up-to-date papers exploring the latest advances in (i) the detection of MPs, (ii) the release and the modelling of their transportation, (iii) technical solutions for preventing their spread in the environment, and (iv) evaluation of the impact of MPs on the ecosystem, (v) microplastics valorization or disposal. This Special Issue covers the presence of MPs in all the environmental matrices (water, air, and soil). Authors are invited to submit papers focusing on this area. Research papers, communications presenting preliminary but significant results, review or systematic review articles are welcome. Perspective/opinion papers can be also submitted.

## About the Journal

### Message from the Editor-in-Chief

As the world of science becomes ever more specialized, researchers may lose themselves in the deep forest of the ever increasing number of subfields being created. This open access journal Applied Sciences has been started to link these subfields, so researchers can cut through the forest and see the surrounding, or quite distant fields and subfields to help develop his/her own research even further with the aid of this multi-dimensional network.
