

Special Issue

Applied Biostatistics for Health Science and Epidemiology

Message from the Guest Editors

The aim of this Special Issue is to stimulate and disseminate information related to the application and development of statistical techniques in the wider area of public health to improve effectiveness and competence of public health interventions, and thus, the overall health outcome of populations worldwide. Public health and epidemiology have a long history of applying statistical methods to investigate critical health-related issues, including disease control, risk prediction, and health awareness, and many revolutions in statistical procedure have ascended from these disciplines. Therefore, this Special Issue welcomes scientific articles relevant to global public health from different countries and cultures, to assemble an issue that raises awareness and understanding of public health problems, through the evaluation of real-life data using modern statistical methods.

Guest Editors

Dr. Fakir M. Amirul Islam

Department of Health Science and Biostatistics, School of Health Sciences, Swinburne University of Technology, Melbourne, VIC 3122, Australia

Dr. Zuhair Natto

Department of Oral Health Policy and Epidemiology, Harvard University School of Dental Medicine, Boston, MA, USA

Deadline for manuscript submissions

closed (30 November 2023)

About the Journal

Message from the Editor-in-Chief

As the world of science becomes ever more specialized, researchers may lose themselves in the deep forest of the ever increasing number of subfields being created. This open access journal Applied Sciences has been started to link these subfields, so researchers can cut through the forest and see the surrounding, or quite distant fields and subfields to help develop his/her own research even further with the aid of this multi-dimensional network.

Editor-in-Chief

Prof. Dr. Giulio Nicola Cerullo
Dipartimento di Fisica, Politecnico di Milano, Piazza L. da Vinci 32,
20133 Milano, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, Inspec, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Engineering, Multidisciplinary) / CiteScore - Q1 (General Engineering)
