

Special Issue

Anticancer Drugs: New Developments and Discoveries

Message from the Guest Editors

Anticancer drugs remain a fundamental pillar of cancer treatment, supporting an increasingly diverse range of therapeutic strategies. This Special Issue will focus on recent breakthroughs in anticancer drug research and development, and we welcome original research articles and reviews that explore innovative approaches to overcoming the current challenges and limitations associated with these. Relevant topics may include, but are not limited to, the following: the development of novel agents with reduced systemic toxicity; improved drug delivery systems (e.g., nanotechnology-based approaches); targeted therapies (through pathway- or molecule-specific mechanisms, with or without nanotechnology); immunotherapies (including cancer vaccines, adoptive cell therapies, etc.); and computational drug repositioning.

About the Journal

Message from the Editor-in-Chief

As the world of science becomes ever more specialized, researchers may lose themselves in the deep forest of the ever increasing number of subfields being created. This open access journal *Applied Sciences* has been started to link these subfields, so researchers can cut through the forest and see the surrounding, or quite distant fields and subfields to help develop his/her own research even further with the aid of this multi-dimensional network.

Editor-in-Chief

Prof. Dr. Giulio Nicola Cerullo
Dipartimento di Fisica, Politecnico di Milano, Piazza L. da Vinci 32,
20133 Milano, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, Inspec, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Engineering, Multidisciplinary) / CiteScore - Q1 (General Engineering)
