

Special Issue

Smart and Innovative Service Design and Implementation

Message from the Guest Editors

With the help of artificial intelligence and network techniques, smart and innovative services are proposed and realized in all kinds of applications, such as manufacturing, live, education, e-commerce, entertainment, etc. Since smart and innovative services are specially designed and implemented in terms of the necessity of the user requirements, all smart and innovative services could provide convenience in different applications with real-world necessities. In the Special Issue “Smart and Innovative Service Design and Implementation”, we invite submissions that consider the applications of smart and innovative services for the topics of theoretical analysis, experimental studies, and system design and implementation. **keywords**

- artificial intelligence
- big data
- cloud computation
- AR/VR/MR
- UAV
- optimization
- security

About the Journal

Message from the Editor-in-Chief

As the world of science becomes ever more specialized, researchers may lose themselves in the deep forest of the ever increasing number of subfields being created. This open access journal *Applied Sciences* has been started to link these subfields, so researchers can cut through the forest and see the surrounding, or quite distant fields and subfields to help develop his/her own research even further with the aid of this multi-dimensional network.

Editor-in-Chief

Prof. Dr. Giulio Nicola Cerullo
Dipartimento di Fisica, Politecnico di Milano, Piazza L. da Vinci 32,
20133 Milano, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, Inspec, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Engineering, Multidisciplinary) / CiteScore - Q1 (General Engineering)
