

## Special Issue

# Artificial Intelligence in Computer Vision and Object Detection

### Message from the Guest Editors

Artificial Intelligence is an essential tool in many technological systems, conferring them the ability to think as a human would. Some of its most important applications include computer vision systems and object recognition. The former can be understood as systems that allow a scene of the real world to be digitally captured in order to analyze it and extract its information. The latter focuses on finding or locating a specific object in a digital image. Therefore, in an integrated system, computer vision allows a scene from the real world to be captured and processed, so that the artificial intelligence can then decide how to act; this can be applied in, for example, diagnosis or the detection of objects in engineering, medicine or health sciences. The aim of this Special Issue is to publish novel scientific articles on the application of artificial intelligence to computer vision or object recognition. It is important to mention that this Special Issue is not limited to any specific artificial intelligence technique or application. Therefore, all original articles and reviews that meet the main objective are welcome.

### Guest Editors

Dr. Luis Alberto Morales-Hernández

Laboratory of Artificial Vision and Thermography/Mechatronics, Faculty of Engineering, Autonomous University of Queretaro, Campus San Juan del Río, San Juan del Río 76807, Queretaro, Mexico

Dr. Saul Tovar-Arriaga

Faculty of Engineering, Autonomous University of Queretaro, Cerro de las Campanas S/N, Santiago de Queretaro 76010, Queretaro, Mexico

### Deadline for manuscript submissions

20 September 2025

## About the Journal

### Message from the Editor-in-Chief

As the world of science becomes ever more specialized, researchers may lose themselves in the deep forest of the ever increasing number of subfields being created. This open access journal Applied Sciences has been started to link these subfields, so researchers can cut through the forest and see the surrounding, or quite distant fields and subfields to help develop his/her own research even further with the aid of this multi-dimensional network.

---

### Editor-in-Chief

Prof. Dr. Giulio Nicola Cerullo  
Dipartimento di Fisica, Politecnico di Milano, Piazza L. da Vinci 32,  
20133 Milano, Italy

---

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, Inspec, CAPlus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q2 (Engineering, Multidisciplinary) / CiteScore - Q1 (General Engineering )
